1100-2100 BOS-08 SYSTEMS

Designed to apply self penetrating Medium to Heavy Oils.
Accommodates Wire Rope Sizes From: .04” (1.0mm) to 1.69” (43.mm)

THE CORELUBE ADVANTAGE FOR RESEARCH SHIPS

- High rope speed lubrication.
- Even lubricant coverage.
- No lubricant wastage.
- Eliminates or reduces lubricant fling-off.
- One brush size covers a large range of rope sizes. Eliminates the need for a rubber seal for every size of wire rope.
- Bushings remove exterior contaminates.
- Bushings snap into the collar without tools.
- Cables deformities can be run through the collar.
- Operates at any angle or direction.
- The collar is extremely strong & light weight.
- Easy to use.

Don’t confuse the BOS systems with grease applicators. (There is no comparison)

Reduce maintenance time & increase your wire rope life.
1100-2100 BOS-08 SYSTEMS

Designed to apply self penetrating Medium to Heavy Oils.
Accommodates Wire Rope Sizes From: .04” (1.0 mm) to 1.69” (43.0 mm)

THE CORELUBE ADVANTAGE FOR RESEARCH SHIPS

Lubricant Penetration is Key.
